# Select Plant Material for People and Planet

- Find Balance: Consider both community & cultural desires and health of our urban forests

# Create Realistic Project Designs

- Size Matters: Understand project scope and size

# Find Common Goals

- Identify and highlight overlap: Do we have the similar deliverables? How can we work together?

## Unique Orchard Sites

Thousands of stewards trained & supported  
A thriving national network sharing best practices

Who/What might be affected by this decision?

Is there a power imbalance?

# Questions to Foster Collaboration and Transparency

What don't I know and where can I get that knowledge?

Who is missing from this conversations? Do I need to map out my stakeholders?

Who is an expert? How can we work with them?

What will this look like in 5 years? In 10? In 20?
